

— CONCEPT A — CALM & MINIMAL

A quieter way to build good *habits*.

No leaderboards, no nagging notifications every hour. Just a gentle daily rhythm — your child checks off what's done, you confirm with a glance, and the week fills in on its own.

— HOW IT WORKS

Three quiet steps, every day.

Each task carries its own soft colour — a private visual language your family learns without ever thinking about it.

Check it off

Your child marks a task done from their own simple list — teeth, homework, lunch, bedtime. No timers, no pressure.

Confirm with a glance

You get one soft notification. Check in, tap approve. If life gets busy, it approves itself after a day.

Watch the week fill in

Points build quietly toward rewards you've already agreed on — never a surprise, never a negotiation.

*"We didn't want another app shouting at our kids.
We wanted something that just... kept up with them."*

– a note from the design brief, not a testimonial we made up

2 taps for a parent to validate a task

24h before an unreviewed task quietly approves itself

0 push notifications outside the daily digest

Ready for a calmer evening routine?

Set up your first child and task list in under three minutes.
